HP Vivid Photo Inks

Outstanding speed

HP Double Swath Technology provides breakthrough speed and performance. The HP Designjet Z6800 Photo Production Printer includes two sets of four HP 771 Designjet Printheads, creating a wide print swath—up to 1.67-inches/42.5 mm—and a high firing frequency to deliver prints with amazing speed. Eight bi-color printheads feature 1,056 nozzles per color, 1,200 nozzles per inch, and small drop volumes for top photo quality.

The **HP Optical Media Advance Sensor (OMAS)** allows you to print at top speeds and still get great output results. This breakthrough technology improves paper-advance control and accuracy, so the printer can print at higher speeds across multiple environmental conditions without impairing image quality.

High productivity

Meet demanding requests and deliver high-impact prints. Fast speeds and high processing power help cut turnaround times. Achieve excellent image quality at production speeds. Confidently print unattended with large ink cartridges and a take-up reel.

Amazing color

Consistently achieve accurate colors using advanced HP technologies with complete coverage of FOGRA gamuts. Generate custom ICC profiles with the embedded spectrophotometer with i1 color technology from X-Rite. Print from your favorite design applications or through RIPs.

The **HP Designjet Utility** lets you easily navigate through color-management, printing, and job-management workflows, and the HP Color Center provides easy-to-use, step-by-step instructions on how to add new media and calibrate the printer. Plus, the HP Designjet Z6800 printer's accounting tool allows you to easily track supplies use by job, while the job submitter tool lets you submit your HP-RTL, HP-GL/2, CALS G4, PostScript®, PDF, TIFF, EPS, and JPEG files directly to the printer.

HP Vivid Photo Inks

Three shades of black HP ink produce outstanding optical density and smooth transitions. Deliver durable prints that stand the test of time. HP 771 Printheads are designed to achieve precise, accurate placement of smaller drops at high speed. Each printhead prints two colors of ink with 1,056 nozzles per color.

Using **HP chromatic red ink**, your HP Designjet printing system provides the broad color gamut needed to produce vibrant color and deep, rich blacks and to achieve true photo-realistic image quality.

High, **uniform gloss** provides the professional finish. With a wide range of blacks and grays with smooth, subtle transitions, true gray neutrality, and rich black density, you can produce remarkable black-and-white prints. And these prints provide lasting results with exceptional print permanence indoors in-window and away from direct sun.⁷
